AiM farm set for beginners (Article: 3053)

As a result of the new EU food hygiene regulations milk producers, as food companies, are also subject to quality assurance obligations. They are fully responsible for their products in terms of product liability and preventive consumer protection. With the **farm set for beginners** from AiM GmbH, milk producers can carry out the officially prescribed inhibitor test (Brilliant Black Reduction Test, BRT) themselves on the farm.

Everything you need for the test is contained in a handy bag. You can now test milk from treated cows after the withdrawal time has elapsed as well as milk to be delivered before it is collected by the tanker fast and reliably to ensure that it is free of inhibitors.

Composition:

- Thermo-block for 5 BRT test tubes
- Milk producer test set
- Product information
- Timer
- Edding
- Sample protocol
- Bottle for milk samples
- Bag

AiM milk producer test set (Article: 3050/3055)

The milk producer test set may be reordered at any time. It is available in two packing units. Article 3050 contains 25 BRT test tubes, 25 disposable pipettes and the Inhibitor Free Milk (negative control). Article 3055 contains 100 BRT test tubes, 100 disposable pipettes and the Inhibitor Free Milk.

Performing the test is easy:

1. Preparation

- Switch the thermo-block on
- Mix sample well
- Mark the test tubes

2. Preparing the negative control

Dip the pipette into the milk and activate it by pressing the upper air chamber. Pipette the negative control (Inhibitor Free Milk) into a test tube and then close the tube with the cap.

3. Preparing the samples

Important: Use a different pipette and BRT test tube for each sample.

4. Incubate the test tubes

65 °C

Incubate the test tubes until the test medium in the tube with the negative control changes from blue to yellow.

2:30 hours +/- 15 minutes

5. Interpretation of the results

left = Negative control
(Inhibitor free sample)

middle = Suspicious sample

right = Sample contains inhibitors

Milk with positive/suspicious results must not be delivered!
